

GRUNDKARTA

Kartbeteckningar enligt Värmdö kommun och HMK-kartografi Skala 1:2000

Grundkarta upprättad av Metria Hallsberg i maj 2014 genom
utdrag och komplettering av Värmdö kommuns digitala primärkarta.

Koordinat- och projektionssystem SWEREF 99 18 00. Höjdsystem RH2000.

Aktuellt:

Fastighetsindelning 2016-07-01

Detaljinformation 2016-06-29

Kartstandard enligt HMK-Ka 2.2.6.1

Ann-Britt Hellsström
Metria AB

The map shows the Krasnodar region with a red dashed line indicating the city limits. The 'Serevyi strond' and 'Bova Kovat' settlements are located within this area. The Krasnodar river is shown flowing through the region, with the 'Krasnodar' city limits marked by a red dashed line. The 'Serevyi strond' and 'Bova Kovat' settlements are located within the city limits. The 'Krasnodar' river is shown flowing through the region, with the 'Krasnodar' city limits marked by a red dashed line.

The diagram shows a fuzzy set 'KONEXIONTSILUE' represented by a dashed boundary. The process of determining membership is shown in three steps:

- 1**: The initial fuzzy set boundary is shown.
- 2**: A horizontal dashed line is drawn across the set, representing a specific membership value.
- 3**: The area under the boundary and above the horizontal line is shaded with diagonal lines, representing the fuzzy membership function for that specific value.
